

Anderson Software's completely anonymous tip management products have never been breached or compromised in any manner over the past 20 years. This is a testament to the extent to which Anderson goes to try to ensure the integrity of its entire system and the data that resides within it.

Anderson uses a highly secure and trustworthy datacenter. It is certified as a SSAE 16 SOC 1 Type II and SOC 2 Type 1 HIPAA compliant host. Anderson employs two dedicated servers for this P3 application. One is a MS SQL Server and the other a web/app server.

Both have abundant and redundant resources, including dual RAID 10 totally encrypted solid state drive arrays in each to insure high availability of the system at all times.

Both onsite and offsite backups are performed nightly on each server. Onsite and off-site SQL data backups are also performed every 5 minutes to help minimize any potential data loss and easy restoration to a recent point-in-time.

Our application has been designed to be HIPAA, HITECH, CJIS and FERPA compliant. This involves, among other measures, utilizing a fully managed firewall, an intrusion prevention system, web application firewall, IP reputation filtering, vulnerability scans, anti-virus protection, two-factor authentication via VPN for admin access and a log management system. All data is encrypted on the drive while at-rest and all data is also encrypted during all communications between client and server (in-transit). Anderson Software has also dedicated additionally encrypted field at the database level where highly secure data may be placed for an extra layer of protection.

In order for the product to be trusted and respected, Anderson Software must maintain complete integrity of the system and protection of the concept of public reporting in general without placing the reporting party at risk. Anderson Software has performed this very task for the past 19 years.

Law enforcement agencies and schools rely on Anderson's experience and knowledge in this area to provide the safest and most secure system of this type. Anderson takes security very seriously and its track record of no breaches in our history speaks volumes. Anderson Software continues to employ industry best-practices to keep the record clean.
